Saluja CAD has leveraged the proliferation of Internet as well as advanced & more convenient communication technologies, to position itself as a high quality off shore services firm for many companies. Our services are hired on an absolutely 'as-required' basis very regularly by our customers from across the world. Whether it is conversion of old images into CAD files, 2D to 3D Models, 24 X 7 technical support services, we have successfully overcome the difficulties encountered in off shore outsourcing by being able to operate as if our team was physically present right in front of you. Simple yet effective systems enable us to overcome the barriers of time zones as well as distance to provide world-class back-end services.

We can also set up a professional team exclusively dedicated to cater to your requirements. We can provide technical support engineers who will be trained on your products and services in detail and take web based queries 24 hours a day from your customers and solve them on the spot.
